NPSL-1000 Overview

The NORWOOD NPSL-1000 portable slit lamp is an ideal solution for ophthalmology, optometry and veterinary practices. With its hand-held operation, users are able to examine patients who don't have ability or cannot sit comfortably at a traditional slit lamp. It is extremely light and portable and comes in a custom case to easily carry and store.

Excellent Optical Quality

Especially fit for children, ward rounds, screening

Large Slit Angle

Illumination max up to 60 degrees

Excellent Visual Field

One-Hand Operation- Easily adjust observation magnification during the inspection, helps doctors quickly find the lesion in a larger field of vision and transfer to a higher magnification for better observation

Warm LED

Warm light for better clinical observation of eye tissues and LED light source for longer and safer use

* Smart Phone and Smart Phone Bracket (shown above) not included. May be purchased through select online retailers based on your specific device.

** Smart Phone screen and images simulated.
